The Douglas-fir, named for David Douglas, a 19th century Scottish botanist who traveled through Oregon in the 1820s, was designated state tree in 1939. Great strength, stiffness, and moderate weight make it an invaluable timber product said to be stronger than concrete. Averaging up to 200' in height and six feet in diameter, heights of 325' and diameters of 15' can also be found.

Among Oregon's most famous landmarks is Seaside's 1.5-mile oceanfront promenade and its famous automobile turnaround at the beach. Originally built as a boardwalk in 1908 and replaced with concrete in 1920, the Prom is the perfect place for a morning jog, a casual walk, a bicycle ride, or just enjoying Seaside's best people-watching. Savor the spectacular panoramic views of the Pacific Ocean, beachgrass-covered dunes, and the rainforest-covered Tillamook Head as you stroll past varied oceanfront homes.

Today the caddies will be handing out a small credit card sleeve. That's an odd handout, but here's why we chose it: Many credit and debit cards, enhanced drivers licenses, etc, have a radio frequency identification (RFID) chip embedded in the card. This chip contains personal and account information needed to complete transactions. Identity thieves can merely pass you on the street and download your personal data. The patented RFID blocker sleeves use a special alloy to protect your data. They can also protect your room key or credit cards from becoming demagnetized from your cell phone. My daughter loves them, and I hope you will find them useful!
