Book of the Day: Bumblepuppy Days by Julian Laderman

Interesting: For all readers regardless of level

Julian Laderman is a math professor from New York. If you were to meet him on the street, this is exactly what you would guess his profession to be. He is kindly, chatty, a little disheveled and has an honest self-deprecating sense of humor. It turns out that he is married to a history professor. He has written a couple of award-winning bridge books on declarer play and squeezes. All of this comes together beautifully in this lovely, well-researched, fun-to-read history of the early days of Whist and Bridge.

An early version of his intro promised that you wouldn't learn any bridge by reading the book. While he had to renege on this promise (because he decided to include several hands to illustrate differences in various games), this book is definitely about history and not about improving your game. Still, it's fascinating to learn about the various players in the development period of our game and to learn details of the foundations that bridge was originally based on. In addition, he brings in other un-related games like baseball and basketball to illustrate influences of various factors on games in general, factors such as gambling, ethics, balancing luck and skill, and so on.

Julian includes sections for each major related game: whist, bridge whist, auction bridge and contract bridge. In each, he covers rules (at a high level), history of the game, related toys and apparatus and a sense of the world of the game and what led to its demise.

While he reneged on his promise about improving your game, he still includes a money-back guarantee, one that I'm sure he need not worry about. Drop by the book store and take a look at this very fun book!
